

Installing Enviroclad Decorative Cladding:

- Ensure walls are clean & dry. Remove loose tiles, loose paper, and flaking paint.
- Ensure shower tray/bath is fully installed. Remove/loosen fittings from walls. (Shower fittings, soap holders, etc.).
- Seal bath trim (if using) into position. (Fig.1)
- Fit bottom Starter trim onto Bath seal using Silicone 799 (Fig.2)
- **Fill bottom Starter trim with Silicone 799** (Fig.2)
- At a corner:
 - Option 1: fit Internal Corner Profile (fig.3)
 - Option 2: butt join planks in the corner and seal with silicone 799 (fig 4.)
 - Option 3: apply bead of silicone799 (Figs .5.).
- Cut first plank to length - less 7mm, to allow fitting into top and bottom Starter trims (also allows for expansion).
- Apply adhesive to reverse of plank - horizontal strips to width of plank, approx. every 400mm.
- Fit plank in position & press firmly onto wall.
- If cladding shower/over bath, seal lip of each plank with silicone before fitting the next to ensure watertight seal (Fig.6)
- Cut top Starter trim to length and place in position.

Fig.3

- External Corner profiles are available for use on corners if required. (Around door, window etc.)
- When fitting cladding to a shower, Starter trim can be used as a stop bead at shower door or to finish edge of the final plank.
- Ensure adhesive and sealant are cleaned from face of cladding before they set.
- Cladding can be fitted behind radiators but is not suitable for use with a direct heat source, e.g. solid fuel cookers {heat greater than 60°C}. A stainless steel panel should be fitted behind cookers/hobs.
- Please refer to the current brochure for full product details.
- Recessed Lighting: Please note that only PL or CL type low energy down lighters are suitable for use with Enviroclad ceiling panels
